

Paramjeet Singh

Country: India

Course: Diploma of Information Technology (Software Development)

Institute: TAFE NSW – Western Sydney Institute, Mount Druitt College

Paramjeet Singh, an international student from Punjab, India, came to Australia in 2007 to study a Diploma-to-Degree program in Information Technology at TAFE NSW – Western Sydney Institute.

He achieved an outstanding result in the Diploma of Information Technology (Software Development) and received the TAFE NSW – Western Sydney Institute International Student of the Year Award in 2008.

Paramjeet’s commitment to his study was demonstrated by his exemplary achievement in what is considered to be one of the most difficult Information Technology (IT) courses. He always showed a positive attitude towards his studies and respect to staff and colleagues at all times. He was an excellent student and his information technology teachers considered him a pleasure to teach.

The Diploma of Information Technology (Software Development) focuses on developing high-level skills for analysis, implementation and management of emerging and converging information and communication technologies, so that graduates can integrate this into the business process to support an organisation’s strategic goals.

Paramjeet chose the course to build and sharpen his IT skills. His teachers reported he brought innovative ideas and direction to class and was able to work effectively with other students as a team member, a team leader and mentor, and a project manager.

“I learnt programming skills throughout the course which was a dream of mine. The knowledge I gained from my teachers at TAFE NSW – Western Sydney Institute continues to be really helpful.”

As a Diploma-to-Degree student, Paramjeet completed his TAFE NSW Diploma and has guaranteed entry into a bachelor degree at the University of Western Sydney to become a programmer.
