

Vikaas Chhatwal

Country: India

Course: Advanced Diploma of Information Technology (Network Security)

Institute: TAFE NSW – Northern Sydney Institute, Meadowbank College

TAFE NSW hands-on teaching approach is what attracted Vikaas Chhatwal from India to the Information Technology (Network Security) course at TAFE NSW – Northern Sydney Institute, Meadowbank College.

“I met the teachers and visited the laboratories before enrolling in the course in 2010 and had no second thoughts about studying at TAFE NSW Meadowbank College.

I wanted hands-on experience from experts... And I am happy to state that all of that was met at TAFE NSW.”

Vikaas received the TAFE NSW – State Medal for achieving top marks for the Advanced Diploma of Information Technology (Network Security).

The Medal is awarded to students who achieve the highest marks in New South Wales for a chosen course, based on 2011 results.

“Studying at TAFE NSW and receiving the State Medal will always be a special part of my life.”

Vikas found the intensive theory and practical skills training the course offered prepared him for work as either an independent Information and Computer Technology (ICT) specialist or as part of a team responsible for advanced ICT network security systems.

Vikas works as Network Engineer at PnP Solutions Pty Ltd. The training enhanced his skill-set and provided the opportunity to specialise in a number of areas including voice, wireless, network infrastructure and sustainability.

“It has added a lot to my skill-set and also helped me at work.

I would really encourage others considering further study to enrol at TAFE NSW and give it their best.”

TAFE NSW Institutes are the largest education and training provider in Australia and offer over 300 practical, work-oriented training courses for international students in campus locations in Sydney and across New South Wales.
